

MESH-POWER™

Reshaping
your
world.

POWERFUL DUST EXTRACTION

FOR A BREATH OF FRESH AIR

Sanding can be dusty and messy. But with Norton MeshPower sanding discs you get virtually dust free sanding; meaning a cleaner, healthier working environment, a better finish and a much more comfortable sanding experience.

Norton MeshPower discs are a multi-functional abrasive, designed with thousands of holes, created by the unique open mesh backing. This mesh structure allows powerful, effective dust extraction in any application.

Patented Norton No-Fil technology works to prevent clogging for a better finish and longer life, saving operators time and money. It also allows the grain to wear evenly resulting in a finer scratch pattern, and faster, more consistent results throughout the product life.

SAINT-GOBAIN

POWERFUL DUST EXTRACTION MEANS A CLEANER, SAFER WORK ENVIRONMENT

We've answered the demands for a cleaner and safer working environment with Norton MeshPower discs. The open construction of the mesh backing allows dust particles to flow freely through the thousands of tiny holes, creating a virtually dust free sanding environment. Better for your health, better for your application and better for your business!

With a more rigid backing in coarser grits for heavy duty applications, to flexible, lighter weight backing for flexibility on curves and contours, MeshPower will make your job faster, cleaner and more efficient.

FEATURES AND BENEFITS

- Mesh matrix backing is comprised of thousands of tiny holes
- Powerful dust extraction virtually eliminates harmful dust created by sanding operations
- Allows for a cleaner, healthier working environment
- Reduces clean up time - a welcome benefit for any busy sander!
- Norton No-Fil technology is applied to the abrasive grains
- Prevents clogging for a consistent cut and longer product life
- Improves productivity and value for the money
- Offers a better, faster finish with finer scratch pattern
- Self-grip hook and loop backing with no designated hole pattern
- Easy to align to any back-up pad - just apply and go!
- Can be used on a variety of materials, on machine, or by hand on flat or contoured surfaces
- Open structure and premium resin bond system
- Can be used wet or dry for the perfect results
